- 13:15:43 From Joyce's Anderson : There is a story abt a child that suffered seizures everyday for three years, every 10 minutes. The scientific community could not find the answer to the cause. As medical Marijuana was just becoming accepted, the couple tried to add it to their daughter's treatment. The medical Community in their state said they could not use it. The family moved to CO, found new physicians & the right Marijuana formula & after it's first admin the Mother tears up bc it was the first time in the child's life she was still for more than 10 minutes. There are vets in my area who use it successfully for many maladies! just wanted you to know about this; you could probably find out about it online!
